RELEASE OF LIABILITY

By assembling or using this CrazyFly Kiteboarding product (further named only as product), you agree that you have read and understood the CrazyFly kiteboarding manual (further named only as manual) before using this product. You also agree that you will ensure any other user of this product to read and understand this manual before allowing this person to use this product.

ASSUMPTION OF RISK

Using this product involves certain inherent risks, dangers and hazards, and can cause severe injuries, damage, or death to both the user and to nonuser third party. The user of this product assumes and accepts any and all risks related to the usage of this product. The risk of using this product can be greatly reduced by acquiring training lessons in an accredited kiteboarding school, following the guideline principals of this manual and by using common sense.

FOR YOUR SAFETY AND THE SAFETY OF OTHERS:

- We strongly advice every user of this equipment to take professional lessons in an accredited kitesurfing school.
- Always be extremely careful when using this equipment.

- The safest way to use this equipment is on water.
- You are responsible for yourself and others when using this product.
- Always use the safety system in case of an emergency.
- Always use the right kite size for your ability and wind conditions. Do not over estimate your abilities. Be aware that strong gusts can be life threatening.
- Never kite in stormy weather and strong gusts. The kite may attract lightning.
- Never kite when there are obstacles downwind of you.
- Never kite in off or on shore wind conditions.
- Never kite under the effect of drugs and alcohol.
- Never kite alone.
- Never kite without a safety system.
- Never tie yourself to the kite permanently. You should always be able to let go of the kite rapidly in a case of emergency.
- Do not try to grab a kite by its lines. Under tension, they can be as lethal as a razor blade.
- Do not use this kite as a flying device or a floating device.

MEANINGFUL TIPS FOR YOUR SAFETY AND THE SAFETY OF OTHERS:

1. Helmet, life vest and harness. It is highly recommended to wear a helmet, life vest and a harness when learning to kite and using this product. The harness should be comfortable and of strong manufacture.
2. Choose your practice spot carefully. The best spot for learning to use this product is an accredited kiteboarding school. When choosing a spot after taking kiteboarding lesson in an accredited kiteboarding school, look for:
 - The least crowded place (but do not kite alone).
 - Spot which is free of obstacles, such as houses, trees, electric lines, cars etc. Always consider enough room for error.
 - Shallow water with sideshore winds.
 - It is always good to have a safety boat near by.
3. Check for weather and wind conditions. Check the local weather forecast. Check the wind direction and speed, which might change during the day. You should not ride in stormy weather or strong gusts. The kite may attract lighting.
4. Respect other kites. Always look around you and pay attention to other kites. Do not hesitate

to help others launch or land their kites. Never unwind your kite line on top of others'. Never land your kite on top of someone's lines, it may cause danger.

5. Respect people standing by. Always inform spectators about the power of the kite and the potential risk for them when staying downwind from a kite surfer.
6. Learn to use your safety system. Always check carefully before flying this kite, if the safety system is not worn out and works properly. Learn how to use the push away safety system. Never fly this kite without the safety system, which allows you to rapidly kill the power of the kite. Use a safety leash which connects you to the kite. This leash should also be releasable for cases of emergency.

BAR

1. Depower line
2. PU covered central line
3. Floaters
4. Bar ends
5. Push away safety system
6. Releasable chicken loop
7. Swivel

6.

SAFETY SYSTEM

8. Blue plastic part
9. White bottom part
10. Safety line
11. Metal end loop
12. Safety leash
13. Donkey stick

7.

SAFETY SYSTEM

These steps clearly explain how the push away safety system works. It is simple and safe.

Follow these steps every time before riding, because the safety system can get worn out and may not work properly.

Please, check carefully if the safety system is working before every riding session.

Make sure that there is no sand or dirt inside the safety system.

Rinse the safety system with clean water after every ride if possible.

SAFETY SYSTEM

1. Always attach your kite with your safety leash to your harness.

2. In case of an emergency, simply push away the blue plastic part of the quick release with CF logo.

3. This activates the main safety and releases the metal end loop of the chicken loop.

4. Now the chicken loop is open. This rapidly kills all the power of the kite. You are now connected to the kite only via the safety leash, which should also be releasable in a case of extreme emergency.

10.

5. To re-assemble the safety system, push the blue plastic part up with your left hand. Then push and click-in the metal end of the chicken loop with your right hand under the stainless steel lever mechanism of the quick release.

6. After clicking-in the metal end of the chicken loop under the stainless steel lever mechanism, let go of the blue plastic part in your left hand to close the system. Now the quick release safety system is ready to be used again.

11.

WARRANTY

The most important thing of all in the warranty section is **to register your kite online on:**

WWW.CRAZYFLYKITES.COM/REGISTER

By registering, you increase the speed of handling the warranty issue and ensure your warranty rights.
